Department of Information Technology (B.Sc.I.T Semester V)
Enterprise Java
PRACTICAL - VI

Roll No.: T032	Name: KHUSHI
Class: TYIT	Batch:2
Date of Assignment: 07-08-26	Date/Time of Submission: 07-08-26

6. Implement the following EJB Applications

A] Create a Currency Converter application using EJB

Right Click on Source Packages Directory in the Projects pane.

Select:

New - Other

Under the New File Window, select:

Enterprise Java Beans in Categories.

Then select:

Session Bean in File Types.

Click Next.

Give Name as:

CCBean

Give Package as:

EJPracts

Select:

Stateless as Session Type.

Then click Finish.

CODE:-

Index.html : -

```
<!DOCTYPE html>
<html>
<head>
<title>Currency Converter</title>
</head>
<body>
<form action="CCServlet">
Enter Amount<input type="text" name="amt"><br>
Select Conversion Type
<input type="radio" name="type" value="r2d" checked>Rupees to Dollar
<input type="radio" name="type" value="d2r">Dollar to Rupees<br>
<input type="reset"><input type="submit" value="CONVERT"><br>
</form>
</body>
</html>
```

CCBean.java : -

```
package EJPracts;
import javax.ejb.Stateless;
@Stateless
public class CCBBean {
```

```

public CCBean() {
}
public double r2Dollar(double r) {
return r / 83.85;
}
public double d2Rupees(double d) {
return d * 83.85;
}
}

```

CCServlet.java :-

```

import java.io.IOException;
import java.io.PrintWriter;
import javax.ejb.EJB;
import javax.servlet.ServletException;
import javax.servlet.annotation.WebServlet;
import javax.servlet.http.HttpServlet;
import javax.servlet.http.HttpServletRequest;
import javax.servlet.http.HttpServletResponse;
import EJPracts.CCBean;
@WebServlet(urlPatterns = {"/CCServlet"})
public class CCServlet extends HttpServlet {
    @EJB
    CCBean obj;
    public void doGet(HttpServletRequest request,
        HttpServletResponse response)
        throws ServletException, IOException {
        PrintWriter out = response.getWriter();
        double amt = Double.parseDouble(
            request.getParameter("amt")
        );
        if (request.getParameter("type").equals("r2d")) {
            out.println(
                "<h1>" + amt + " Rupees = "
                + obj.r2Dollar(amt)
                + " Dollars</h1>"
            );
        }
        if (request.getParameter("type").equals("d2r")) {
            out.println(
                "<h1>" + amt + " Dollars = "
                + obj.d2Rupees(amt)
                + " Rupees</h1>"
            );
        }
    }
}

```

OUTPUT:-

Enter Amount

Select Conversion Type ☒ Rupees to Dollar ☐ Dollar to Rupees

1000.0 Rupees = 11.926058437686345 Dollars

Enter Amount

Select Conversion Type ☐ Rupees to Dollar ☒ Dollar to Rupees

1000.0 Dollars = 83850.0 Rupees

B] Develop a Simple Room Reservation System Application Using EJB.

Right Click on Source Packages Directory in the Projects pane.

Select:

New – Other

Under the New File Window, select:

Enterprise Java Beans in Categories.

Then select:

Session Bean in File Types.

Click Next.

Give Name as:

ReservationBean

Give Package as:

EJPracts

Select:

Stateless as Session Type.

Then click Finish.

CODE :-

Index.jsp : -

```
<html>
<head>
<title>Room Reservation</title>
</head>
<body>
<p><b>Enter Details For Room Reservation.</b></p>
<form method="post" action="ReservationServlet">
Customers Name:
<input type="text" name="cname" value="" size="20">
<br><br>
Address:
<input type="text" name="cadd" value="" size="20">
<br><br>
Phone Number:
<input type="text" name="cph" value="" size="12">
<br><br>
Room Type:
```

```

<select name="roomtype">
<option value="General">General</option>
<option value="Deluxe">Deluxe</option>
<option value="Suite">Suite</option>
</select>
<br><br>
Check In Date (DD/MM/YYYY):
<input type="text" name="checkindate">
<br><br>
Check Out Date (DD/MM/YYYY):
<input type="text" name="checkoutdate">
<br><br>
Payment Mode:
<select name="paymode">
<option value="CASH">CASH</option>
<option value="CREDIT CARD">CREDIT CARD</option>
</select>
<br><br>
<input type="submit" value="Submit">
</form>
</body>
</html>

```

ReservationBean.java : -

```

package EJPracts;
